Abhi Singh

Full Stack Developer | Node.js | NestJS | Next.js | PostgreSQL | Redis | AWS | Docker | TypeScript

https://linkedin.com/in/developer-abhi-j1714/ Mumbai, India

SUMMARY

Full Stack Developer with 2 years of experience building and maintaining production web applications using Next.js, NestJS, TypeScript, PostgreSQL, Redis, and AWS.My work focuses on backend API development, database optimization, cloud infrastructure, distributed job processing, and scalable application development. I have hands-on experience managing production deployments, CI/CD pipelines, monitoring, and backend performance optimization.Some technologies I work with include:• Next.js• React• Node.js• NestJS• PostgreSQL• Redis & BullMQ• AWS (EC2, S3)• Docker• Nginx• GitHub Actions• Prometheus• Grafana• Lokil'm currently looking for Full Stack and Backend Developer opportunities where I can contribute to building scalable production systems and continue growing as a software engineer.

EXPERIENCE

Full Stack Developer

Algoocean Technologies Pvt. Ltd. Jun 2024 - Present

Full Stack Developer

- Develop and maintain scalable backend services using NestJS, TypeScript, PostgreSQL, and Redis for Oodle, a consumer platform serving over 500K registered users.
- Design and optimize REST APIs, database queries, and asynchronous workflows using Redis and BullMQ.
- Manage production infrastructure on AWS including EC2, S3, Docker, PM2, Nginx, CI/CD pipelines, automated deployments, and monitoring.
- Implement centralized monitoring and observability using Prometheus, Grafana, Loki, and Promtail.
- Build and maintain Infodatabox, a cloud-based file storage platform supporting secure file uploads and management.
- Present

Full Stack Engineer

Algoocean Jun 2024 - Present

Developed and maintained scalable backend services using NestJS, TypeScript, PostgreSQL, and Redis for a consumer dating platform Oodle serving over 500K registered users. Designed and optimized REST APIs, improving application performance through efficient PostgreSQL queries, indexing, and asynchronous processing using Redis and Bull queues. Managed production infrastructure on AWS, including EC2, S3, Nginx, Docker, PM2, automated backups, GitHub Actions CI/CD, and deployment automation. Optimized PostgreSQL queries, managed production deployments, and resolved infrastructure issues to improve application reliability and performance. Built distributed background job processing using Bull queues and Redis for notifications, user matching, scheduled tasks, and other asynchronous operations. Implemented centralized monitoring and log aggregation using Prometheus, Grafana, Loki, and Promtail, improving production observability and reducing issue diagnosis time.
Present

Full Stack developer

SAAR IT RESOURSES PRIVATE LIMITED Jun 2025 - Nov 2025

Goregaon, India

Recently joined as a Full Stack Developer working primarily with the MERN stack (MongoDB, Express.js, React.js, Node.js). The role is flexible, and I also get the opportunity to work with other technologies like Laravel (PHP) and Python depending on the project requirements.
Currently contributing to a project involving ArcGIS, where I'm helping integrate geospatial tools into web applications.
Tech I'm working with:
React.js, Node.js, Express.js, MongoDB, Laravel, PHP, Python, ArcGIS, Postgress

EDUCATION

Bachelor of Computer Applications, Computer Programming, Specific Applications

Tilak Maharashtra Vidyapeeth, Pune

Jan 2023 - Dec 2026

Bachelor's Degree

Tilak Maharashtra Vidyapeeth

EXPERIENCE

Full Stack Engineer

SAAR IT Jun 2025 - Nov 2025

- Contributed to the MCGM 3D GIS project by developing and maintaining geospatial web applications using ArcGIS, React, Node.js, and PostgreSQL.
- Built Python-based automation and data processing services to support GIS workflows and improve operational efficiency.
- Worked across multiple technology stacks including Laravel (PHP), Node.js, and PostgreSQL to deliver project requirements within tight development timelines.

Javascript Developer

Datagain Feb 2025 - Jun 2025
