SUMMARY

Full Stack Developer with 2 years of experience building production web applications using Next.js, NestJS, TypeScript, PostgreSQL, Redis, and AWS. Experienced in backend API development, database optimization, distributed systems, cloud infrastructure, CI/CD, and scalable application design.

EXPERIENCE

Full Stack developer
June 2024 – Present
Algoocean

- Developed and maintained scalable backend services using NestJS, TypeScript, PostgreSQL, and Redis for a consumer dating platform Oodle serving over 500K registered users.
- Designed and optimized REST APIs, improving application performance through efficient PostgreSQL queries, indexing, and asynchronous processing using Redis and Bull queues.
- Managed production infrastructure on AWS, including EC2, S3, Nginx, Docker, PM2, automated backups, GitHub Actions CI/CD, and deployment automation.
- Optimized PostgreSQL queries, managed production deployments, and resolved infrastructure issues to improve application reliability and performance.
- Built distributed background job processing using Bull queues and Redis for notifications, user matching, scheduled tasks, and other asynchronous operations.
- Implemented centralized monitoring and log aggregation using Prometheus, Grafana, Loki, and Promtail, improving production observability and reducing issue diagnosis time.

Full Stack developer
June 2025 – November 2025
SAAR IT

- Contributed to the MCGM 3D GIS project by developing and maintaining geospatial web applications using ArcGIS, React, Node.js, and PostgreSQL.
- Built Python-based automation and data processing services to support GIS workflows and improve operational efficiency.
- Worked across multiple technology stacks including Laravel (PHP), Node.js, and PostgreSQL to deliver project requirements within tight development timelines.

SELECTED PROJECTS

Infodatabox – Cloud Storage Platform (Algoocean)
Cloud-based file storage platform with secure file uploads, sharing, and access management built with Next.js, NestJS, PostgreSQL, AWS, S3, EC2, and Redis.

- Developed a cloud-based file storage platform with secure file uploads, sharing, and access management.
- Built scalable backend APIs using NestJS and integrated AWS S3 with multipart uploads for efficient large file storage.
- Deployed and maintained the application on AWS EC2 with Nginx, PM2, automated backups, and monitoring.
- Implemented user authentication, storage management, and responsive file management features using Next.js.

Init.new – AI Website Builder (Cursor on web)
AI-powered SaaS platform that generates complete web applications from natural language prompts built with Next.js, Convex, MongoDB, Auth.js, Google Gemini API, and Open Ai sdk.

- Built an AI-powered SaaS platform that generates complete web applications from natural language prompts.
- Integrated Gemini API to generate and refine application code through an interactive chat interface.
- Embedded a browser-based code editor with live preview using Sandpack.
- Implemented secure authentication, token-based billing, and project persistence using Auth.js and Convex.

Trading Bot
Automated cryptocurrency trading platform integrating Delta Exchange APIs for order execution built with React, TypeScript, and Python FastAPI.

- Built an automated cryptocurrency trading platform integrating Delta Exchange APIs for order execution.
- Developed a React dashboard for configuring strategies, monitoring trades, and viewing performance metrics.
- Implemented automated trading strategies using technical indicators with secure API key management.

EDUCATION

Bachelors in Computer Application (BCA), Computer Application
Tilak Maharashtra Vidyapeeth
2026

HSC, Field
MPBSE
2022

KEY SKILLS

TypeScript | JavaScript | Python | Java | Next.js | React.js | Redux | Tailwind CSS | HTML5 | CSS3 | ShadCN | Zustand | Node.js | NestJS | Express.js | REST APIs | WebSockets | JWT Authentication | Redis | BullMQ | WebRTC | System Design | LLD | PostgreSQL | MongoDB | Prisma ORM | Mongoose | TypeORM | AWS (EC2 | S3 | IAM | Lambda) | Docker | GitHub Actions | Nginx | PM2 | Linux | Prometheus | Grafana | Loki | Promtail | Jenkins | Git | GitHub | Firebase | Cloudflare | Selenium | Google cloud console | Google cloud pub/sub | Google Play Console | Claude Code | Cursor
