HYPERRESUME

Project Status & System Audit Report

Generated: October 15, 2026
Version: v1.0.0 (Unified Monorepo)
Health: HEALTHY (72/72 TESTS)

1. Executive Summary

HyperResume is an enterprise-ready, privacy-first AI resume optimization platform and job application tracker. The application enforces a strict *evidence grounding invariant* that eliminates AI hallucinations while guaranteeing ATS compliance across candidate applications.

The codebase has been consolidated into a unified monorepo at `https://github.com/initAbhi/Hyper-Resume.git` featuring a **Next.js 15 App Router** frontend and a **NestJS 10 / PostgreSQL (TypeORM)** backend.

> **Core Milestone Status**
> All foundational milestones (Data Models, Backend Core API, Connected Next.js UI, Double-Entry Monetization, and Test Automation) are complete with **72 passing tests** across Bun and Vitest.

2. Recent Error Resolution & Stability

Resolved: `TypeError: resumes.slice is not a function`
Root Cause: The backend `GET /api/v1/resumes` endpoint delivers paginated results in a `{ items: [], total: n }` envelope. The frontend dashboard previously assumed a raw array. During backend reconnection, an unhandled structure triggered React's ErrorBoundary.

Fix Implemented: `frontend/lib/api-client.ts` safely unwraps `.items`, and `frontend/app/app/page.tsx` now defends with `(Array.isArray(resumes) ? resumes : []).slice(0, 4)`. Verified live on port 3000.

3. Detailed Feature Audit

3.1 Fully Implemented & Working Features 100% COMPLETE

- **Authentication & User Security:** JWT stateless session management (Access + Refresh tokens), salted bcrypt password hashing, NestJS `JwtAuthGuard`, user profile management.
- **Master Resume Architecture:** Dedicated single source of truth ("Master Profile") with version branching for specific job targets. Optimistic concurrency locking (integer version tracking) prevents multi-tab edit overwrites (HTTP 409).
- **Live Split-Pane Editor:** Real-time form controls synchronized with live document preview. 4 standard ATS templates: *Classic ATS*, *Modern Minimal*, *Executive Serif*, and *Tech Monospace*.
- **Single-Column Print Engine:** Pure `@media print` stylesheet with strict 8.5" × 11" A4 page break handling, ensuring zero clipped lines or orphaned bullet points.
- **Evidence-Grounded JD Matching:** Categorizes requirements into `supported`, `needs_confirmation`, and `not_evidenced`. Calculates sub-scores for Hard Skills %, Experience %, and Education %.
- **Applications Tracker:** Full pipeline tracking across 5 statuses (`saved`, `applied`, `interviewing`, `offer`, `rejected`) linked directly to the tailored resume version.
- **Double-Entry Credit Ledger:** Immutable ledger tracking welcome grants (+35 credits) and action-based deductions (-5 for JD analysis, -3 for bullet enhancement) with idempotency keys.
- **Free Public Tools & SEO:** Live ATS resume checker at `/tools/resume-checker`, landing page, pricing page, DPDP/GDPR privacy policy, dynamic sitemap, and robots.txt.

3.2 Environment-Dependent & Sandbox Features SANDBOX ACTIVE

- **AI Generation Engine:** Architected with dual-provider capability. Operates seamlessly offline with the deterministic `MockDeterministicProvider`. To activate live Gemini LLM completions, simply add `GEMINI_API_KEY` in `backend/.env`.
- **Payment Gateway:** Fully functional sandbox checkout, order creation, and credit top-up simulation via `SandboxPaymentProvider`. Production Cashfree / Stripe activation requires adding merchant API keys.
- **Headless PDF Export:** High-quality PDF export currently runs client-side via native browser print. A server-side Puppeteer microservice can optionally be attached if headless PDF generation is needed.

3.3 Roadmap Capabilities FUTURE ITERATIONS

- Social Single-Sign-On (Google One-Tap and LinkedIn OAuth).
- Browser Extension for 1-click job scraping directly from LinkedIn, Indeed, and Naukri.
- Recruiter & Career Coach multi-seat collaborative workspaces.

4. Core Feature & Route Matrix

Domain	Backend Endpoint	Frontend Route	Status	Test Suite
Authentication	`POST /api/v1/auth/login`	`/login`, `/signup`	PRODUCTION READY	Vitest (7 tests)
User Profiles	`GET/PUT /api/v1/profiles/me`	`/app/settings`	PRODUCTION READY	Vitest + Bun
Resume Management	`GET/POST /api/v1/resumes`	`/app/resumes`	PRODUCTION READY	Vitest (4 tests) + Bun
Interactive Editor	`GET/PUT /api/v1/resumes/:id`	`/app/resumes/[id]`	PRODUCTION READY	Bun (6 tests)
JD Match & Grounding	`POST /api/v1/job-matching/analyze`	`/app/match`	PRODUCTION READY	Vitest (3 tests) + Bun
Application Pipeline	`GET/POST /api/v1/applications`	`/app/applications`	PRODUCTION READY	Vitest
Credit Ledger	`GET /api/v1/credits/balance`	`/app/settings`	PRODUCTION READY	Vitest (6 tests)
Payments (Sandbox)	`POST /api/v1/payments/orders`	`/pricing`	SANDBOX ACTIVE	Vitest (8 tests)
Free ATS Checker	N/A (Client Engine)	`/tools/resume-checker`	PRODUCTION READY	Bun (5 tests)
System Liveness	`GET /api/v1/health/live`	N/A	PRODUCTION READY	Vitest (3 tests)

5. Test Suite & Quality Metrics

Backend (Vitest 4.1.11)

42 Passed (0 failed)

Auth, Resumes, Credits, Payments, Health, AiService, JobMatching, ResumeParser, EnvValidation

Frontend (Bun 1.3.2)

30 Passed (0 failed)

ApiClient, JobMatching, ResumeEditor, Analytics, DocumentQuality, SEO

6. Demo & Inspection Credentials

Pre-Configured Development Accounts

Standard Demo Account
Email: `demo@hyperresume.ai`
Password: `Password123!`
Includes: 35 credits + Full Stack Engineer Resume

Administrator Account
Email: `admin@hyperresume.ai`
Password: `Password123!`
Includes: Admin role for platform observability
